

AFT Local 2121

Resolution in Support of the March for Science on Earth Day, April 22, 2017

Whereas AFT 2121 represents CCSF educators whose mission includes the teaching of sciences, respect for fact-based knowledge acquisition and critical thinking; and

Whereas, current political actors aim to specifically inhibit scientific study and communication, evidence-based policymaking is under attack; and

Whereas budget cuts, censorship of researchers, disappearing datasets, and threats to dismantle federal government agencies may harm us all, putting our health, food, air, water, climate, and jobs at risk; and

Whereas, March for Science - San Francisco "celebrates public discovery, understanding, and distribution of scientific knowledge as crucial to the freedom, success, health, and safety of life on this planet"; therefore be it

Resolved that AFT 2121 supports the March for Science San Francisco.
