Petition to Protect Student Space in the Multi-Use Building at City College of San Francisco

The students, faculty, and staff at City College of San Francisco, and the community demand the District cease plans to move administrative offices into the Multi-Use Building (MUB). The newest building on campus, MUB was bond funded and designed for classroom and program-specific needs. Child Development and Heath Education students depend on these spaces created to meet their learning outcomes. We urge the administration to find an alternative location for administrative services and preserve MUB as a student space.
